RE: Canyon Rim Bridge Trail Project - Final Completion and Project Award

Mr. Booth:

Kiewit New Mexico Co. would like to thank you and your team for your outstanding work in helping deliver the Design/Build Canyon Rim Bridge Trail Project on time. This pedestrian bridge project was an overwhelming success due in large part to the "can do" attitude of your team. Warren Mohn was very helpful in producing a concept that we could present to Los Alamos County to win the job. Your design and drafting team did an excellent job of transferring the concept to a one of a kind structure that fit all the needs of the client. Sergio Barrera and his team delivered the bridge ahead of the original schedule and to an exact fit. Overall, it was truly a team effort.

We appreciate all of your efforts and we are happy to inform you that this project completed by our team of Kiewit New Mexico Co., Wilson & Company and Arizona Structure Technologies, Inc. has received an Honorary Mention in the Southwest Contractor Magazine's Best Of 2010 Project Awards. We would like to invite you and your team to attend awards banquet with us on December 14th in Albuquerque.

Please let me know if you will be able to attend the banquet and accept the enclosed framed picture of the project. Again, thank you for your part in this project and Kiewit looks forward to future endeavors with Arizona Structures Technologies, Inc.

Sincerely,

Chris Frieberg, PE
